

DESIGN YOUR HERO'S TOOL

Heroes are all around us from the fire fighters and the paramedics, to teachers and parents. But would they be heroes without their trusty accessories and tools?

We want to encourage you to collaborate with others. Ideas are often better when they are shared. Ask an adult to share your hero's tool with us on social media with #YoungWriters #Heroes.

The police badge represents public trust, with which they have the authority to act and the duty remain true to at all times.

The badge identifies who they are and who they work for; an easily recognisable sign of legal authority. Police officers proudly wear their badges to show their commitment to the communities they serve and pride they have in being an every day hero.

The stethoscope is a medical tool which allows doctors to listen to the internal sounds of a human body. It is used to listen to lung and heart sounds.

Stethoscopes are considered a symbol of doctors. Research in 2012 showed that the stethoscope, when compared to other medical tools, had the highest positive impact on the perceived trustworthiness.

Dogs love to chew bones for the yummy taste! They see bones as a reward for good behaviour, and therefore they learn to do this behaviour again. The simply bone aids dogs to become better heroes and to be a hero as often as they can.

As well as being a reward the bone allows the dog to switch off from their duties and relax. This means when they are on guide dog duty they can really focus on helping their human.
