

# TELLING THE TIME

Help your child to understand the minute and hour hand with this handy half-term hack

## LET'S GET STARTED!

1. Cut out each of the two clock faces, the minute and the hour hands
2. Glue the black clock on top of the blue clock (make sure both the dials are perfectly aligned)
3. Use a metal split pin to attach clock hands at the center of clock. Make sure the hands move easily
4. Your learning clock is ready!
