

Identifying the main idea and supporting details

Instructions: Read the passage. Then complete the activities that follow.

Many birds and snakes eat lizards. But lizards use tricks to stay safe. A frilled lizard stretches the skin around its neck. Then it hisses. This makes the lizard seem big and mean. Other lizards can break off their tails. The tail wiggles. Then the lizard can get away.

Lizards also use their skin colour to hide. Green lizards may hide in the grass. Brown lizards may hide on the rocks. The colour makes it hard for animals to see them. No lizard wants to be a snack. They use tricks to stay safe.

Instructions: Circle the main idea.

- A. Birds and snakes eat lizards.
- B. Lizards use tricks to stay safe.
- C. Lizards like to hide in the grass.

Instructions: Write a title for the passage.

Instructions: Draw a lizard trick.
