

Name _____

Problem-Solving Application
Getting Data from a Table

The table shows how many cans the class collected at school.

Cans Collected

Day	Mon.	Tues.	Wed.	Thurs.	Fri.
Number of cans	12	6	23	19	8

Use the table to solve each problem. Show your work.

1. Write the two days when the least numbers of cans were collected.

2. How many cans were collected on Thursday and Friday together? _____

3. Write the two days when the most cans were collected.

4. How many cans were collected on Monday and Wednesday together? _____

5. How many cans were collected on the days that the least number of cans and the most number of cans were collected? _____
